EARLY MARKET. Special May

EARLY MARKET is an improved "Wheeler" of splendid flavor, medium large, very firm, good shipper. Ripens 15 days ahead of the Early Wheeler, and a better peach in every way. This is the most profitable early peach we know of. Originated from seedling in Grayson County, Texas. Very hardy. Very prolific. Cling. You can hardly wait for the first peach of the year; you won't have to wait so long when you have an Early Market tree in your orchard.

SILVER CLING. Special. August
Originated near Denison, Texas

SILVER CLING. Medium large to very large. White to gray, with silver bloom, very firm, juicy, sweet, good keeper, small seed, hardy prolific. Grows well on the thinnest clay soil. Ripens all through August sometimes lasting till the middle of September. Last year one of our customers from 1 acre (108 trees) gathered an average of 5 bu. per tree and sold them for \$1.50 per bu. making him for 1 acre in peaches from 1 crop \$810.00. "It not only looks like silver, it makes the silver jingle into your pockets."

HONEYCOMB. Special. September
La Chance Seedling, of Blackland Belt, of Texas

HONEYCOMB. Very large. Beautiful yellow and red, firm, good keeper, good shipper, hardy, prolific. Very valuable, (a chance seedling of the Blackland Belt of Texas.) There is an ever increasing demand for good peaches that ripen after Elberta is gone. We have labored to get varieties improved to meet this demand, and now believe we have perfected some very valuable varieties. "It grows into money, and brightens the home. Sweet as the honey, and the honeycomb."

CRYSTAL. Clear white, cling, sweet, juicy, firm, good keeper, hardy, prolific. The best October Peach for Hugo and vicinity. Every home should have a "Crystal." "Makes the cleanest sweet pickles and preserves." Originated in Red River second bottom. "Transparent and clear, with a flavor that's here."

1 each of these 7 Wonderful Peaches, \$3
2 of each for \$5

Extra Choice Special PEACHES

IMPROVED AND GROWN BY

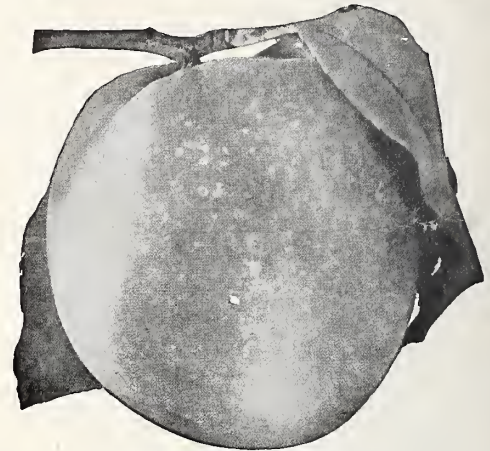

BUSH BROS. NURSERIES

HUGO, OKLAHOMA

Choice Young Trees now ready for Shipment. This Selection supplies you with the Finest Peaches in the world from May to Christmas Day

LUTON FREE.

This is by far the richest and most beautiful Peach we have ever seen ripen in June. Large, firm and hardy. "The more you eat, the more you want." A seedling, of the red soil district.

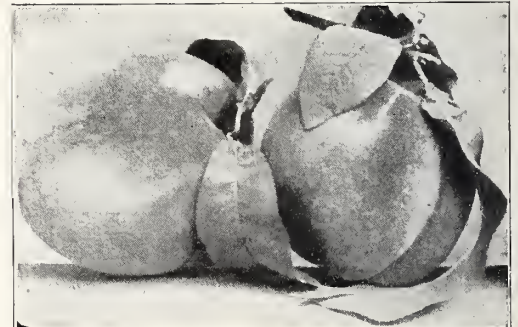

LUTON FREE. Special. June

SUPERB.

Cream white, freestone, with decidedly red blush, and red next to the seed. Hardy, prolific, large, fine flavor. Ripens before Elberta.

"Firm and sweet, good to eat."

SUPERB. Special. July

SANTA CLAUS PEACH.

The latest peach known. Also one of the finest peaches of them all. Large cream, with red blush, firm, cling. The best keeping peach we have. We pick them about the time of the first frost here in November and place in a cool dry place and keep them all along till Christmas and New Years Day. Originated and introduced by Bush Bros. here at Hugo, Oklahoma.

SANTA CLAUS PEACH. Christmas Day

PLUMS

"Plums so Rare—Plums to Spare"

Special Collection No. 2—May to October

1 Each of these Eight Specials for..... \$4.00
2 Each of these Eight Specials for..... 7.50

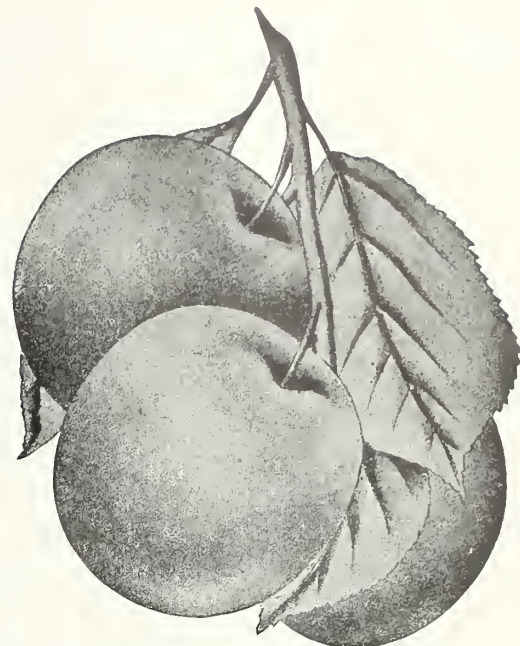

COMPASS CHERRY PLUM. June to July. 50c.

COMPASS CHERRY PLUM.—Cross between a plum and a cherry. Growth is more like cherry than plum. Fruit a mass of giant cherries after all other cherries are gone. You will likely call it both a cherry and a plum. Very desirable.

PROGRESSIVE.—This is undoubtedly the largest plum in the world, and very choice in every way. Ripens from June 1st to July 15th. No home should be without Progressive plums. Originated by Bush Bros.

BANANA PLUM.—Medium size, round, dark red skin, with yellow meat. Very rich. You can show your Bananas to your heart's content.

Originated in the Red River Valley.

SUPERIOR PLUM. Special 1. June. 50c.

SUPERIOR.—Same parentage as Jewel Carpenter, but larger, prettier shape and richer, solid red skin. Very fine for every use. Originated by us near Denison, Texas. Has fruited regularly for four years. "It is all its name implies."

BANANA PLUM. July. 50c.
Tastes like a good ripe Banana

FRANCIS I.—Cross between a plum and apricot, retaining the growth of a plum with a mixed flavor. Very large; golden yellow; heavy cropper; hardy. Never fails to bear. Originated at Sherman, Texas, from seed planted by Mrs. Francis Johnson. Aug. 50c.

COMMUNITY PLUM. September. \$1.00 each

COMMUNITY PRUNE.—The best and only successful Prune for this climate. Crossed with plum to make it hardy, yet it is a real Prune. Very fine. Originated in Red River Valley.

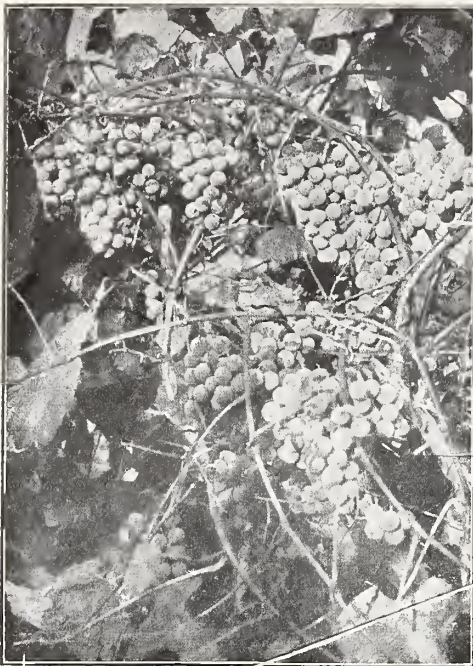

JEWEL CARPENTER.—Japan Plum crossed with a native Chickasha. Very large; meat firm; good shipper; meaty; juicy; sweet. "A very valuable Plum." Originated from seed planted at Hugo. The earliest plum known. May 10. 50c.

AUTUMN SPECIAL PLUM.—Medium large, very rich, meaty, solid; good shipper; ripens well through Sept. and Oct. The most valuable of all late Plums. Never fails to make a full crop. Comes in after all other Plums are gone. Originated by Bush Bros., Hugo, Oklahoma.

AUTUMN SPECIAL. The last to ripen—October. 75c. Each

OTHER PLUMS IN STOCK—WRITE US YOUR WANTS

POST OAK - HYBRID GRAPES

The two varieties shown are only to let you see how much better they are in this climate. They are crossed with the wild post oak until they are almost as hardy as the native itself. We have them ripening from July until frost
